

Control of Contractors

Many companies are not aware that they are responsible for the Health & Safety of contractors that are commissioned to carry out work on their premises or sites within their jurisdiction. This can cause major problems to any company if an accident occurs involving their contractor and the company has not ensured that the contractor has the necessary Health & Safety risk assessments and safe systems of work in place. This course ensures that delegates are fully informed of the legal and practical considerations of controlling contractors.

Duration

One day.

Who should attend

People involved in letting or managing work undertaken by contractors on their premises or sites under their jurisdiction.

Aims and objectives

Provide the delegate with a good understanding of the requirements and implications of non-compliance when managing contractors.

Content

- English legal system
- Civil liability
- Statute law
- Health & Safety at Work etc Act 1974
- Safe systems and permits to work
- Assessing and managing contractors

Certification

Certificate of attendance on successful completion of the course.

See current Course Schedule for details of dates & prices
