

Management of Asbestos

The Control of Asbestos at Work Regulations, lay down the requirements for the protection of people being exposed to asbestos. These regulations include the requirement for those with a responsibility for the maintenance and/or repair of non-domestic premises, to identify and manage any risk from asbestos within their premises. This course ensures that delegates are fully informed of the legal and practical considerations of working with Asbestos.

Duration

One day.

Who should attend

People involved with management of premises, maintenance workers and landlords.

Aims and objectives

Enable delegates to establish the methods used to identify asbestos and the course of action to take once discovered.

Content

- Current and new legislation
- Asbestos building products
- Analysis techniques
- Evaluating the risks
- Cost effective solutions to asbestos problems

Assessment method

Interactive discussions during the course delivery.

Certification

Certificate of attendance on completion of the course.

See current Course Schedule for details of dates & prices
